No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 12, P

Sequence 3, Application US/08068747;
Patent No. 5695933;
GENERAL INFORMATION:
APPLICANT: Schalling, Martin
APPLICANT: Hudson, Thomas J.
APPLICANT: Housman, David E.
TITLE OF INVENTION: Direct Determination of Expanded
TITLE OF INVENTION: Nullectide Repeats in the Human Genome
NUMBER OF SEQUENCES: 11
CORRESPONDENCE ADDRESS:
CORRESPENT Hamilton, Brook, Smith & Reynolds, P.C.
STREET: Two Militia Drive

Patent No. 5776744

GENERAL INFORMATION:
MAPPLICANT: GLAZER, PETER M.
APPLICANT: GLAZER, PETER M.
COMPOSE DINVENTION: EFFECTING HOMOLOGOUS RECOMBINATION
UNMER OF SEQUENCES:
ADDRESSEE: ONCORPHARM, INC.
STREET: 200 PERRY PARKMAY
CITY: GALTHESBURG
COUNTRY: USA
ZIP: CANTENSBURG
STATE: MARYLAND
COUNTRY: USA
ZIP: ANAYLAND
COUNTRY: USA
ZIP: ANAYLAND
COMPUTER READABLE FORM:
MEDIUM TYPE: STORAGE
COMPUTER: APPLE MACINTOSH POWERBOOK 520
OPERATION SYSTEM: MACINTOSH
SOFTWARE: WORD PERRECT 3.5
CUMBUTER: APPLE MACINTOSH
SOFTWARE: WORD PERRECT 3.5
CLASSIFICATION NUMBER: US/08/467,126
FILING DATE: O'LUN 1995
CLASSIFICATION NUMBER: 30.649
REGISTRATION NUMBER: SARTA, CLENN E.
REGISTRATION NUMBER: 20.649
REFERENCE POOCKET WUMBER: 20.649
TELEROMONICATION INDRAMATION:
NAME: KARTA, CLENN E.
REGISTRATION NUMBER: 20.649

ATTORNEY/AGENT INFORMATION:
NAME: Paul, Thomas D.
REGISTRAITON NUMBER: 32,714
REFERENCE/DOCKET NUMBER: D-5393
TELECOMMUNICATION INFORMATION:
TELEPHONE: 713/651-516
TELEPA: 762829
INFORMATION FOR SEQ ID NO: 7:
SEQUENCE CHARACTERISTICS:
LENGTH: 28 base pairs
TYPE: NUCLEIC ACID
STRANDENDESS: single
TOPOLOGY: Linear
MOLECULE TYPE: Triplex forming oligonucleotide
HYPOTHETICAL: YES
                                                                                                                                                                                                                                                                                                                                                                                                                              Length:

Sequence 4, Application US/09590211A

Patent No. 6828430

GENERAL INFORMATION:
APPLICANT: Rouleau, Guy A.
APPLICANT: Brais, Bernard
ITILE OF INVENTION: FOR OCULOPHARYNGEAL MUSCULAR DYSTROPHY AND DIAGNOSTIC THereof
ITILE OF INVENTION: FOR OCULOPHARYNGEAL MUSCULAR DYSTROPHY AND DIAGNOSTIC THereof
ITILE OF INVENTION: FOR OCULOPHARYNGEAL MUSCULAR DYSTROPHY AND DIAGNOSTIC THEREOF
ITILE OF INVENTION: FOR OCULOPHARYNGEAL MUSCULAR DYSTROPHY AND DIAGNOSTIC THEREOF
ITILE OF INVENTION NUMBER: US/09/590,211A

CURRENT FILING DATE: 1999-12-09

PRIOR FILING DATE: 1997-12-09

Sequence 4, Application US/08068747
Patent No. 565533
GENERAL INFORMATION:
APPLICANT: Schalling, Martin
APPLICANT: Housman, Thomas J.
APPLICANT: Housman, David B.
TITLE OF INVENTION: Direct Determination of Expanded
TITLE OF INVENTION: Nucleotide Repeats in the Human Genome NUMBER OF SEQUENCES:
CORRESPONDENCE ADDRESS:
ADDRESSEE: Hamilton, Brook, Smith & Reynolds, P.C.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             COUNTRY: USA

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 770,
